LEAN MANUFACTURING

LM_{LINE}

Alusic

LEAN MANUFACTURING

EN

Alusic offers two solutions in order to fulfill the modern requirements as for lean manufacturing. The choice can be made between the traditional solution consisting of steel tubes and external joints and the modular one consisting of aluminium profiles and accessories, line deriving from Alusic's tradition in structural profiles manufacturing. The roller tracks are compatible with both systems. The two solutions contribute to achieve improvement in corporate structure and production.

IT

Alusic propone due tipi di soluzioni per soddisfare le moderne esigenze di lean manufacturing. Possiamo valutare sia la tradizionale soluzione composta da tubi e giunti esterni in acciaio o la soluzione modulare in alluminio composta da profili ed accessori, linea che deriva dalla tradizione Alusic con i profili strutturali. Le rulliere sono compatibili con entrambi i sistemi. Entrambe le soluzioni contribuiscono ad un miglioramento dell'organizzazione aziendale ed ad uno snellimento della produzione.

ES

Alusic ofrece dos soluciones para satisfacer las modernas necesidades en el ámbito del lean manufacturing. Podemos evaluar la solución tradicional compuesta por tubos y uniones de acero como la solución modular compuesta por perfiles y accesorios de aluminio; línea que deriva de la tradición de Alusic con los perfiles estructurales. Los transportadores estándar son compatibles con ambos sistemas. Las dos soluciones contribuyen a mejorar la organización empresarial y la producción.

FR

Alusic propose deux solutions pour répondre aux modernes exigences du lean manufacturing. On peut choisir entre la solution traditionnelle composée de tubes et joints externes en acier et la solution modulaire composée de profilés et accessoires en aluminium, ligne qui dérive de l'expérience Alusic dans le secteur des profilés structurels. Les rails à galets sont compatibles avec les deux systèmes. Les deux solutions permettent une meilleure organisation de l'entreprise et de la production.

DE

Alusic bietet zwei Lösungen an, um die moderne Anforderungen in Bezug auf Lean Manufacturing zu befriedigen. Man kann wählen zwischen der traditionellen Lösung aus Stahl Rohre und Äußere Verbinder und der modularen Lösung aus Aluminium Profile und Zubehör; diese Linie stammt von der Alusic Tradition als Hersteller von Aluprofilen. Die Rollenschiene sind mit beiden Systemen kompatibel. Beide Lösungen verbessern die Unternehmensorganisation und die Produktion.

ROHRE UND ZUBEHÖR FÜR LEAN-REGALSYSTEME

EN

The system processing is designed to supply the operator with the correct quantity of components during their assembly operations. This achieves a reduction in errors and processing times, as well as production improvement.

The system offers the following advantages:

- strong
- easy to assemble
- wide range of possible adjustments
- cost reductions
- reduction in supply times
- improvements to workstations

IT

Il sistema è studiato per avere a bordo linea la scorta necessaria dei componenti utilizzati dall'operatore durante la fase di montaggio favorendo così la riduzione di errori e tempi di lavorazione e il miglioramento della produzione.

Il sistema presenta dunque i seguenti vantaggi:

- robustezza
- facilità di montaggio
- elevata regolazione
- riduzione costi
- riduzione tempi di asservimento
- miglioramento postazioni di lavoro

ES

El sistema ha sido estudiado para disponer en la línea de la provisión necesaria de los componentes utilizados por el operador durante la fase de montaje. De este modo, el operador siempre cuenta con la cantidad adecuada de material y no pierde tiempo abandonando el puesto de trabajo sin necesidad; además, se reducen las posibilidades de error y los tiempos de trabajo, mejorando la producción.

El sistema ofrece las siguientes ventajas:

- robustez
- facilidad de montaje
- gran capacidad de ajuste
- disminución de los costes
- reducción de los tiempos de interconexión
- mejora de los puestos de trabajo

FR

Le système est conçu pour avoir sur la ligne le stock nécessaire de composants utilisés par l'opérateur pendant la phase de montage. Ainsi, l'opérateur dispose toujours de la quantité adéquate de matériel et ne perd pas de temps en devant abandonner son poste de travail lorsque cela n'est pas nécessaire. De cette façon, les possibilités d'erreurs diminuent, tout comme les durées de fabrication, améliorant ainsi la production.

Le système comporte donc les avantages suivants:

- solidité
- facilité de montage
- capacité de réglage élevée
- réduction des coûts
- réduction des durées d'asservissement
- amélioration des postes de travail

DE

Das System wurde konzipiert, damit der Bediener alle erforderlichen Bauteile für die Montagearbeiten direkt neben der Linie zur Verfügung hat. Auf diese Weise verliert er keine Zeit durch unnötiges Verlassen des Arbeitsplatzes. Außerdem mindert das System die Möglichkeit, Fehler zu machen, reduziert die Arbeitszeiten und verbessert damit die Produktion.

Das System bietet folgende Vorteile:

- Robustheit
- Montagefreundlichkeit
- große Verstellmöglichkeit
- Kostenreduzierung
- kürzere Zuführzeiten
- Arbeitsplatzverbesserung

TECHNICAL SPECIFICATIONS

SPECIFICHE TECNICHE / ESPECIFICACIONES TÉCNICAS / CARACTÉRISTIQUES TECHNIQUES / TECHNISCHE SPEZIFIKATIONEN

The steel tubes are coated with ABS, a plastic material which is resistant to chemicals, automotive oils and corrosion.

Il tubo d'acciaio è rivestito di ABS, un materiale resistente alle aggressioni chimiche, agli oli utilizzati nell'industria automotive e alla corrosione.

El tubo de acero está revestido con ABS, un material resistente a las agresiones químicas, a los aceites usados en la industria automovilística y a la corrosión.

Le tube en acier est revêtu d'ABS, un matériau résistant aux agressions chimiques, aux huiles utilisées dans l'industrie automobile et à la corrosion.

Das Stahlrohr ist ABS-beschichtet, ein gegenüber chemischen Angriffen, Ölen der Automobilindustrie und Korrosion beständiges Material.

PROFILES AND ACCESSORIES FOR GRAVITY SYSTEMS

PROFILI E ACCESSORI PER SISTEMI A GRAVITÀ
PERFILES Y ACCESORIOS PARA SISTEMAS POR GRAVEDAD
PROFILÉS ET ACCESSOIRES POUR SYSTÈMES À GRAVITÉ
PROFILE UND ZUBEHÖR FÜR LEAN-REGALSYSTEME

EN Alusic's range of rounded profiles allows the creation of strong, light and extensively configurable structures. The system is based on a trademarked profile design, which can be combined with a wide range of dedicated accessories which are ideal for all industrial applications.

IT La linea di profili arrotondati Alusic garantisce la realizzazione di strutture resistenti, leggere e ampiamente configurabili. La base del sistema sono i profili dal design depositato abbinabili ad una lunga serie di accessori dedicati e ideali per ogni tipo di applicazione nel campo industriale.

ES La línea de perfiles redondeados ALUSIC garantiza la realización de estructuras resistentes, ligeras y ampliamente configurables. La base del sistema son los perfiles de diseño registrado que pueden combinarse con una larga serie de accesorios específicos e ideales para cada tipo de aplicación en el ámbito industrial.

FR La ligne de profilés arrondis ALUSIC garantit la réalisation de structures résistantes, légères et grandement configurables. Les profilés au design déposé constituent la base du système. Ils peuvent être utilisés avec de très nombreux accessoires dédiés, parfaitement adaptés à tout type d'application dans le domaine industriel.

DE Die Linie von Rundprofilen von ALUSIC garantiert die Schaffung widerstandsfähiger, leichter und weitgehend konfigurierbarer Strukturen. Grundlage des Systems bilden die Profile im eingetragenen Design, die mit einer Vielzahl an speziellem Zubehör kombiniert werden können und für jede Art von Anwendung in der Industrie die ideale Lösung sind.
